The Tohoku Region Earthquake and Tsunami Impacts

A massive earthquake centered in the Pacific coast of the northeastern part of the Japanese main land (Tohoku Region) occurred on 11th March.

We would like to express our hearty sympathy with this earthquake victim and sincerely hopes for a quick recovery.

There appears to be little damage to the factories of New Japan Radio Co., Ltd. and our group companies, but the effects of this earthquake on the factories are currently under investigations. The factories scheduled to resume operations as soon as the investigations have been completed.

If we find serious damage to be informed, we announce it.
