

8bit 3ch D/A Converter

■ GENERAL DESCRIPTION

The NJW5210 is 8bit 3ch D/A converter for electronic adjustment. 3ch DC out put can be independently controlled by three-wire serial interface.

The NJW5210 features low operating voltage (2.7V) and can be full-swing outputted regardless of supply voltage.

The small package (TVSP8) is suitable for portable applications.
